

LIBERATECa™

LiberateCa™ is a premium calcium fertilizer intended to provide superior compatibility and flexibility for mixing and application. LiberateCa™ is compatible with most AgroLiquid products, including Pro-Germinator®, providing application flexibility and options not possible when using other calcium products. In addition to compatibility with other AgroLiquid products, LiberateCa™ generally has good compatibility with crop protection products, making it well-suited to use in foliar treatments as well as soil applications.

DIRECTIONS FOR USE

LiberateCa™ is specially formulated with chelated calcium technology to avoid reaction with phosphorus in mixing, providing superior flexibility and options for application. It is well-suited to use in-furrow as part of a row starter package for corn, to promote firmness of fruit in horticultural applications, and to decrease the potential for blossom end rot in tomato production.

LiberateCa™ can be applied:

- with planter placement in a band away from the seed (ex: 2" x 2")
- as a side-dress
- through fertigation

After several days in a mixed solution with other products, the effects of chelation may dissipate, resulting in the development of sediment. To avoid this, mix only the amount needed for a single application.

Technical Data

Weight Per Gallon @ 68° F	9.94 lbs/ gal
Specific Gravity	1.191
pH @ 68° F	7.00
Freezing Point	32° F

Composition

Guaranteed Analysis:

Calcium (Ca)	3.00%
------------------------	-------

Derived from: Calcium Sulfate

For proper agronomic application rates suitable for your geographical area or the maximum allowable non-nutrient application rates per acre, consult a trained soil specialist at AgroLiquid.
