

NResponse™ performs well on all crops. This fast-acting premium nitrogen product provides more flexibility in application than other nitrogen fertilizers. Specifically formulated for effective foliar and soil applications, NResponse™ is quickly assimilated into the crop, providing a fast nitrogen response. It contains the same balanced forms of nitrogen found in other AgroLiquid Nitrogen Suite products. NResponse™ has proven, in situations where a quick nitrogen response is needed, to improve yields and quality, compared to conventional nitrogen sources.

DIRECTIONS FOR USE

NResponse™ can be used anywhere nitrogen is recommended. It is specially formulated to allow for foliar sprays and planter time applications.

NResponse™ can be applied:

- by planter placement in a band away from the seed (ex: 2" x 2")
- as a top-dress or side-dress application
- as part of a foliar fertility program
- through fertigation

If applied with other crop production or protection products, please consult your AgroLiquid representative for the best application method.

Technical Data

Weight Per Gallon @ 68° F	9.80 lbs/ gal
Specific Gravity	1.174
pH @ 68° F	7.41
Freezing Point	35° F

Composition

Guaranteed Analysis:

Total Nitrogen.	24.00%
2.00% Nitrate Nitrogen	
2.00% Ammoniacal Nitrogen	
20.00% Urea Nitrogen	
Sulfur (S).	1.00%

Derived from: Ammonium Nitrate, Ammonium Sulfate, Urea

For proper agronomic application rates suitable for your geographical area or the maximum allowable non-nutrient application rates per acre, consult a trained soil specialist at AgroLiquid.

A jar test is recommended for tank mixing: Prepare a small amount of the proposed mix and allow to stand in a glass jar overnight, observing for signs of incompatibility. Ideally, a sample of the test mix should then be sprayed on a small area of the target crop and observed for 3 to 4 days for any phytotoxic effects.
