

Sure-K[®]

Sure-K[®] is a clean, chloride- and hydroxide-free potassium solution. It can be applied in combination with other crop production or protection products and presents a very low risk of crop injury. Sure-K[®] can be used in any cropping situation where potassium is needed. Sure-K[®]'s unique formula provides increased crop utilization, allowing lower total product application volume to produce the same results as other conventional potassium fertility products when applied at typical rates.

DIRECTIONS FOR USE

Sure-K[®] is the ideal product for supplying potassium to your crops.

Sure-K[®] can be applied:

- with versatile planter placement options
- broadcast or banded over the top of the seed zone
- as a top-dress or side-dress application
- as a foliar treatment
- through fertigation
- with crop protection products

Sure-K[®] can provide season-long potassium fertility depending on soil conditions, type of application, and rate. Broadcast applications to the soil may reduce Sure-K[®]'s efficiency. If Sure-K[®] freezes it will not return to solution.

Technical Data

Weight Per Gallon @ 68° F	9.41 lbs/ gal
Specific Gravity	1.128
pH @ 68° F	6.61
Freezing Point34° F

Composition

Guaranteed Analysis:

Total Nitrogen.	2.00%
0.59% Ammoniacal Nitrogen	
0.41% Nitrate Nitrogen	
1.00% Urea Nitrogen	
Available Phosphate (P ₂ O ₅).	1.00%
Soluble Potash (K ₂ O).	6.00%

Derived from: Ammonium Nitrate, Ammonium Polyphosphate, Tri-Potassium Polyphosphate, Potassium Carbonate, Urea

For proper agronomic application rates suitable for your geographical area or the maximum allowable non-nutrient application rates per acre, consult a trained soil specialist at AgroLiquid.
