

accessSM

accessSM is a proprietary high-sulfate formulation intended for application anywhere five or more pounds of elemental sulfur is recommended. These enhanced efficiencies make accessSM both environmentally and economically responsible.

DIRECTIONS FOR USE

When applied according to these specified guidelines, accessSM effectively provides the recommended sulfate needs of most crops.

accessSM can be applied:

- with planter placement in a band away from the seed (ex: 2" x 2")
- broadcast or banded over the top of the seed zone
- as a top-dressing
- as a side-dress
- through fertigation

Technical Data

Weight Per Gallon @ 68° F	11.00 lbs/gal
Specific Gravity	1.318
pH @ 68° F	7.28
Freezing Point	7° F

Composition

Guaranteed Analysis:

Nitrogen (N)	7.00%
7.00% Ammoniacal Nitrogen	
Sulfur (S)	17.00%
17.00% Combined Sulfur	
Iron (Fe)	0.25%
Manganese (Mn)	0.05%
Zinc (Zn)	0.05%

Derived from: Ammonium Sulfate, Ferrous Sulfate, Manganese Sulfate, Zinc Sulfate

For proper agronomic application rates suitable for your geographical area or the maximum allowable non-nutrient application rates per acre, consult a trained soil specialist at AgroLiquid.
