

eNhance™ is a nutritional supplement that combines proprietary chemistry with the proper balance of micronutrients and enzymes to produce greater nitrogen utilization. Using eNhance™ as part of a nitrogen-management program may allow conventional nitrogen solutions to be applied at reduced rates while still maintaining optimal yield potential. By working within the plant, eNhance™ nutritionally fortifies the crop to use nitrogen more efficiently. In addition to reducing applied nitrogen rate, eNhance™ is an excellent source of crop-available sulfate.

DIRECTIONS FOR USE

eNhance™ offers several distinct usage opportunities:

- combined with nitrogen solutions to provide increased nitrogen usability.
- combined with a liquid fertilizer program as a sulfur source.
- in-furrow as a sulfur source.

eNhance™ is primarily a nitrogen supplement to improve the efficiency of liquid UAN fertilizers. Add two gallons per ton of 28% UAN, or 2.25 gallons per ton of 30% or 32% UAN solution.

Technical Data

Weight Per Gallon @ 68° F	10.31 lbs/ gal
Specific Gravity	1.235
pH @ 68° F	6.81
Freezing Point	5° F

**Composition
Guaranteed Analysis:**

Nitrogen (N).	7.00%
7.00% Ammoniacal Nitrogen	
Sulfur (S).	7.00%
Manganese (Mn).	0.07%
0.07% Water Soluble Manganese	
Zinc (Zn).0.07%
0.07% Water Soluble Zinc	

Derived from: Ammonium Sulfate, Manganese Sulfate, Zinc Sulfate

For proper agronomic application rates suitable for your geographical area or the maximum allowable non-nutrient application rates per acre, consult a trained soil specialist at AgroLiquid.
