

Healthy Fields ~ Optimum Yields!

Sure Crop Secondary Elements

Sure Crop Secondary Elements are methodically formulated to prevent and correct nutrient deficiencies. No matter what the soil test calls for, Sure Crop has a solution to provide balanced crop nutrition for optimum crop response.

Sure Calcium 3%

- 💧 Improve plant cellular structure, crop vigor and nitrogen uptake
- 💧 Will mix with and may be applied in combination with Phosphorus

Sure Magnesium 2.5%

- 💧 Central ion of chlorophyll molecules, activates plant enzymes

Sure Sulfur 6%

- 💧 Needed for photosynthesis, nodulation, protein and oil formation

Typical recommendations are between one pint and one quart per acre as a soil or foliar application. For more info, contact your Sure Crop Agronomist.
